Prehospital Trauma Life Support (PHTLS) revised reprint, is a unique, continuing education program that directly addresses trauma issues in the prehospital environment. Following the publication cycle of ATLS (Advanced Trauma Life Support) by the Committee on Trauma of the American College of Surgeons, the PHTLS program is designed to enhance and increase knowledge and skill in delivering trauma care. This revised fifth edition of the PHTLS textbook is the required book for the PHTLS course, and is also ideal for use as the trauma component of a paramedic course or as a general reference book on trauma assessment and management. It combines both basic and advanced trauma concepts and skills in one definitive resource and now features an entirely new chapter on evidence-based guidelines for military medicine, developed by the Committee on Tactical Combat Casualty Care.

PLEASE NOTE: The Instructor's Manual and Slide Set are available for certified PHTLS Instructors ONLY. They are ordered through Mosby but customers must first obtain an "access code" from the National PHTLS office - (800) 94-PHTLS or (601) 924-7744. Individuals may also call the above numbers for information on HOW TO BECOME A PHTLS INSTRUCTOR. PHTLS Course Features: Provides CEUs for First Responders, EMTs, paramedics, nurses, & physicians; Proceeds from the course go to the NAEMT and thus are used to support the profession; It improves the quality of care (Research is
available); Can be incorporated into initial training or as a stand-alone continuing education course; Promotes critical thinking as the foundation for providing quality care. PHTLS (Prehospital Trauma Life Support) is a continuing education program authored and administered by the PHTLS division of the National Association of EMTs (NAEMT) in conjunction with the Committee on Trauma of the American College of Surgeons. The PHTLS textbook is the required book for official PHTLS courses. However, it can also be used outside of the course, adopted or purchased as a stand-alone textbook or reference book. This one book covers both basic and advanced level training. More information on kinematics than any similar book on the market. Airway, Thoracic and Spinal Skills are presented in a heavily illustrated, step-by-step format. Consistent approach! Each body region chapter features info on anatomy and physiology, pathophysiology, assessment and management giving the reader a systematic way of looking at trauma. Chapter pedagogy includes: objectives, opening case scenario and scenario conclusion at the end of chapter, summary, review questions. Features a separate chapter on trauma care for the Military. NEW TO THE REVISED 5TH EDITION: UPDATED and EXPANDED chapter on Military Medicine to reflect the new evidence based guidelines for prehospital care in the tactical environment. This new content was developed in 2002 by the Committee on Tactical Combat Casualty Care, comprised of trauma specialists, operational medical officers, and combat medical personnel. NEW TO THE 5TH EDITION: NEW! A Companion CD-ROM is now included with every book. Contains video clips of all different airway and spinal skills used in PHTLS. Also includes info to
download onto a PDA (such as the Glasgow Coma Scale, Revised Trauma Score, Rule of 9’s, Parkland Formula and Pediatric Vital Signs). NEW! Chapter on Injury Prevention. Provides the reader with information on preventing injuries within their community. NEW! Chapter on Triage, Transport and Trauma Systems. Provides the reader with a "pull it all together" concept of how to triage a trauma patient, how and when to transport a trauma patient and where to transport a trauma patient. NEW! Chapter on the Golden Principles of Prehospital Trauma Care. Provides the reader with guidelines to put all the information together and critically think through every trauma patient. NEW! Information on prolonged transportation. NEW! References for every chapter and suggested reading lists. Providing evidence based prehospital trauma care. NEW! Drug table for commonly used drugs for pharmacologically assisted intubation. Provides general guidelines of current accepted drug use for intubation. NEW! Spinal Immobilization algorithm. Provides general guidelines for when spinal immobilization is appropriate for a trauma patient. ALL NEW PHOTOS! A n entirely new set of photographs for the skills portion of this text. NEW! Face to Face Intubation is a procedure that provides advanced providers with an alternative method of intubating a trauma patient. NEW SPINAL SKILLS! - 2 person technique for standing longboard application and 2-person rapid extrication. Revised - Head Trauma chapter. Expanded coverage of the pathophysiology of secondary brain injury. Expanded coverage of the management of traumatic brain injury. Also now includes information on management of brain injury during prolonged transportation. Revised: Shock
chapter. Now provides information on the complications of shock, expanded coverage on the assessment and confounding factors that contribute to shock, specific guidelines for appropriate use of the Pneumatic Antishock Garment (PASG), and more. Expanded! The Patient Assessment and Management chapter now includes expanded information on hemorrhage control and evaluating level of consciousness at the scene, pain management and assessing of domestic abuse. Expanded! Chapter on trauma in the elderly. Expanded coverage on the systematic effects of aging, the common mechanisms of injury in the elderly and special considerations in the management of the elderly in an ABCDE approach. COMPANION CD-ROM: Includes video presentations of more than 20 skills being performed in "real-time." These skills include: Airway Maneuvers, Dual Lumen Device insertion, Endotracheal Intubation (traditional, face-to-face, nasal), Helmet Removal techniques, Rapid Extrication (2 person and +2 person), Standing Longboard Application (2 person and +2 person), and more!

Students in EMT-Paramedic courses need to know the most recent developments in trauma care. This book provides you with an excellent overview on the principles of trauma care, followed by field techniques for assessment and triage of the patient. Specific trauma injuries are detailed. Treatment methods are covered for the field, emergency department, and special situations material on new procedures, techniques and equipment will add to readers' skills in advanced life support systems. Chapters include field case studies and references to current literature sources in trauma.
Establishing a QA/CQI program/implementation of key concepts/quality mgmt in different environments/tools.

The PREHOSPITAL TRAUMA LIFE SUPPORT (PHTLS) course is a unique continuing education program created from the real need in EMS education for additional training in the handling of trauma patients. The course and the book, PREHOSPITAL TRAUMA LIFE SUPPORT, educate EMS personnel to identify, stabilize, treat, and transport trauma patients with the highest level of care. Prehospital patients who are stabilized and then quickly transported to an appropriate medical facility have the best chance of survival. Identifying the mechanism of injury, interpreting signs and symptoms, understanding pathophysiology, recognizing life-threatening injuries, and honing assessment skills all help the EMT to identify a trauma patient with multiple injuries and perform appropriate interventions. PHTLS treats the trauma patient as a special entity, with needs that differ from those of other patients. Provides the most current information available through
revised and updated chapters which adhere to the new 1998 ATLS guidelines. Features comprehensive coverage for both basic and advanced level training. Emphasizes the foundation of trauma care, specifically understanding the mechanism of injury. Includes in-depth coverage of anatomy and physiology, pathophysiology, assessment and management of trauma to key body systems and regions. Covers special patient populations, including pediatrics, geriatrics and pregnant patients, to refresh the EMT regarding the importance of understanding the differences in physiology and presentation in these special populations. Contains an entire chapter devoted to trauma care in the military, because prehospital care in military situations is indisputably different than most civilian trauma situations. Promotes clear, practical understanding of the proper procedures for airway and spine skills with separate chapters that outline techniques and procedures with photos alongside text in a step-by-step format. Includes chapter objectives, summary, and review questions to help the student self-assess and pick out key points from the material. Includes case scenarios and conclusions to promote critical thinking and allow the student to see real application of the concepts discussed in each chapter. Provides a comprehensive glossary and bibliography to direct the reader when further study on a particular topic is desired. Incorporates more than 300 full-color illustrations, many updated and enlarged from previous edition, to aid in visual learning, comprehension of material, explanation of difficult concepts, and keep reader's interest.
This pocket-sized trauma manual provides a quick reference for those dealing with trauma management. Written in outline format, this resource includes comprehensive coverage of penetrating trauma, blunt trauma, and general surgical emergencies. Contains a useful appendix with an anatomical scoring system, normal laboratory values and physiologic measurements and calculations. Also features helpful algorithms! Unique algorithms give you instant access to diagnostic and surgical approaches covering everything from penetrating and blunt trauma through various common surgical emergencies. An organisation by body system and disease mechanism, so its easy to look up any topic quickly. A chapter on trauma triage that makes it simpler to prioritise patient care including special cases involving disasters or exposures to hazardous materials. An uncommonly effective approach to the treatment of hypoxemia of rib fractures. The latest treatment options for crush injuries. All of the organ injury scoring systems of the American Association for the Surgery of Trauma in a single source.

A new and updated version of this best-selling resource! Jones and Bartlett Publisher's 2011 Nurse's Drug Handbook is the most up-to-date, practical, and easy-to-use nursing drug reference! It provides: Accurate, timely facts on hundreds of drugs from abacavir sulfate to Zyvox. Concise, consistently formatted drug entries organized alphabetically. No-nonsense writing style that speaks your language in terms you use everyday; Index of all generic, trade, and alternate drug names for quick reference. It has all the vital information you need at your fingertips: Chemical and therapeutic classes,
FDA pregnancy risk category and controlled substance schedule; Indications and dosages, as well as route, onset, peak, and duration information; Incompatibilities, contraindications; interactions with drugs, food, and activities, and adverse reactions; Nursing considerations, including key patient-teaching points; Vital features include mechanism-of-action illustrations showing how drugs at the cellular, tissue, or organ levels and dosage adjustments help individualize care for elderly patients, patients with renal impairment, and others with special needs; Warnings and precautions that keep you informed and alert.

This fully revised and updated pediatric companion to Browner et al.'s SKELETAL TRAUMA, 2nd Edition presents the most advanced techniques for managing musculoskeletal injuries in children and adolescents. State-of-the-art coverage by leading experts in pediatric orthopaedics and musculoskeletal trauma includes growth and development, pathology, and complications. The 2nd Edition features new chapters on soft tissue injuries and outcome assessment as well as expanded coverage of child abuse.

These guidelines are the WMS's official statement on the best methods of handling wilderness related trauma, illness, or environmental injury.

The new 6th edition of Sheehy's trusted emergency care resource - now developed in conjunction with the Emergency Nurses Association - features
complete coverage of the essentials emergency nurses need to know. Important discussions focus on basic and advanced life support, intravenous therapy, medical emergencies, trauma emergencies, and emergency care for special populations. Each condition commonly seen in the emergency setting is thoroughly addressed, from signs and symptoms, to diagnosis, treatment, developmental considerations, patient education, and more. New chapters and updated material make this resource a must-have for current practice. Complete, up-to-date, practical information is essential for both clinical practitioners and nursing students. Thorough discussions of each condition include signs and symptoms, diagnosis/diagnostic testing, treatment/interventions, age/developmental considerations, and patient/family education/discharge instructions. Compact, portable size makes it ideal for on-the-spot reference in any setting. Developed in conjunction with the Emergency Nurses Association, featuring expert contributions from respected emergency personnel. 13 new chapters cover: Communication in the Emergency Department Cultural Diversity Intrafacility and Interfacility Patient Transport Emergency Operations Preparedness Triage Patient Assessment Weapons of Mass Destruction Pain Management End of Life Issues for the Emergency Nurse Complementary and Alternative Therapies Airway Emergencies Elder Trauma Substance Abuse Emergencies Updated content includes decontamination and conscious sedation procedures. An updated list of website references now includes pertinent resources for emergency personnel. Consistent format makes it easy to quickly retrieve information in an emergency setting - each chapter discussion includes a list of
conditions and procedures, brief introductory statements, discussion of each condition, key procedures, and references. Over 400 updated photos and illustrations clarify important concepts.

Here's all the practical, must-know information needed to diagnose and manage a full range of spinal disorders. Written with the busy practitioner in mind, this brand-new resource provides a comprehensive overview of contemporary spine surgery, focusing on the key information and procedures needed in the day-to-day practice of spine surgery. Features the expertise of 106 highly renowned clinicians from a wide range of disciplines including orthopaedics, neurosurgery, pediatric neurosurgery, pain management, rehabilitation, and more. Comprehensively covers the full range of spinal pathologies in adults and children. Presents information in brief, highly illustrated chapters, enabling readers to quickly find the information they need. User-friendly format features hundreds of boxes that highlight key concepts in the text. Includes a wealth of tables that summarize disease processes. Explores hot topics in the field such as spinal deformities in osteoporosis · spinal infections · primary spinal tumors · anterior minimally invasive techniques of the lumbar spine · and more. Provides a wealth of clear line drawings on surgical technique. With 112 additional contributors+
AACN Procedure Manual for Critical Care offers comprehensive coverage of procedures unique to the critical care environment. This edition is thoroughly revised, updated, and expanded to reflect the current state of critical care nursing practice. Information is presented in a highly illustrated step-by-step format with supporting rationales for each step of every procedure. This resource also emphasizes evidence-based practice and provides complete coverage of the latest clinical studies. Each procedure is organized in a consistent, step-by-step format with categories that include: prerequisite nursing knowledge, equipment, patient and family education, patient assessment and preparation, procedure, expected outcomes, unexpected outcomes, patient monitoring and care, and documentation. Each procedure is supported by research-based data. Advanced practice procedures are noted with a special AP icon indicating that these procedures should be done only by qualified personnel. 19 new procedures discuss topics such as combitube insertion and removal, transesophageal echocardiography, and patient controlled analgesia. A new Quick Tips feature - located in the Special Considerations column for quick reference - highlights key words and key concepts for each procedure. A new web-enhanced feature at the beginning and end of each procedure directs readers to online supplement materials such as additional art and photographs. Web links connect users to hundreds of continually updated web sites that contain information relevant to critical care nursing practice. 200 new line drawings clearly illustrate important techniques and bring key procedures to life.
This best selling book is an excellent certification preparation tool and also serves as a practical clinical reference. Written with the busy emergency room nurse in mind, this book includes critical pathways, helpful illustrations and tables, sample test questions, and a procedure index. It covers all essential procedures as well as a section on emergency department management & professional issues.

Intended for intensivists and other acute care practitioners, including medical subspecialists, surgeons, and emergency medicine physicians, this manual provides a rapid review of common as well as infrequently encountered disorders, offering diagnostic tips and a step-by-step approach to therapy. Early sections cover management approaches for common physiologic derangements seen in critically ill patients. The main section contains 146 disease-oriented chapters grouped by organ system or discipline, covering common and uncommon diseases, syndromes, and disturbances of homeostasis from the perspective of the ICU setting. These chapters provide concise information on etiology, differential diagnosis, clinical manifestations, lab findings, diagnostic methods, and therapeutic approaches. Other sections deal with trauma and postoperative topics, monitoring, and critical pharmacology. Kruse teaches medicine at Wayne State University School of Medicine. Annotation copyrighted by Book News, Inc., Portland, OR.
A working textbook providing detailed information on the background, recent advances and controversial issues of most conditions encountered in an Intensive Care Unit.

The only in-depth source to focus specifically on surgical complications, this reference provides practical information on the incidence, management, and avoidance of complications encountered during and after surgical procedures. Spanning the vast array of complications related to a wide variety of preoperative, intraoperative, and postoperative events such as organ transplant, amputations, nerve and fracture repair, wound repair, and skin grafting, this guide offers detailed guidance and techniques to recognize and control complications in the operating room, emergency ward, and intensive care unit.

The only trauma management book written by emergency physicians for emergency physicians. Using illustrations, algorithms, and radiographs, this text highlights the most salient features and treatments of the various injury conditions. The goal of this text is to help readers answer the important question, What should I do and when? Pre-hospital care,
resuscitation, emergency department management, and disposition of the trauma patient are thoroughly covered. Authored by emergency physicians, rather than surgeons, this book provides excellent information on the acute management and diagnostic strategies of trauma patients. Tables and boxed text emphasize important information in each chapter. Comprehensive information in each chapter ensures that readers will not have to search for additional literature. Pitfalls and pearls emphasize each chapter's most important features. Helpful algorithms provide readers with real-time care of the patient. Concerns central to emergency practice, whether it be in a level I trauma center or community hospital setting, are emphasized. Challenging case scenarios set the stage for each chapter.

Updated to reflect the 2010 emergency cardiovascular care guidelines, this one-of-a-kind text, pocket reference, and integrated workbook covers both the objectives in the National Standard Curriculum for the First Responder and the new National Education Standards in the recommended course length of 40-60 hours. Students get all the essentials of emergency medical response care without being overwhelmed. Real-world case scenarios provide students with true-to-life experiences, while Team Work boxes focus on the key points needed to work effectively with other emergency responders. A durable pocket guide is packaged with every text for fast, easy access at the point of
And, an integrated workbook at the end of every chapter includes questions in a variety of formats to check student understanding! Caution! boxes provide tips and precautions for emergency first responders. Illustrated step-by-step skill sheets offer easy-to-follow instructions for performing the basic interventions required for certification. Nuts & Bolts sections at the end of each chapter include Critical Points, Learning Checklists, Key Terms, and a listing of the relevant NSC objectives. Updated to reflect the 2010 emergency cardiovascular care guidelines. A new chapter on Environmental Emergencies highlights those situations most encountered by an emergency first responder in the out-of-doors. Documentation and Communications chapter details EMS communications, the essentials of documenting patient care and covers therapeutic communication as it relates to cultural variations. Expanded coverage of response to man-made and natural disasters as well as new content on eye irrigation, alcohol and drug crises, nerve agent poisonings, and rural and industrial accidents prepares you to respond to any situation. Companion DVD features 12 skills videos and 24 dynamic medical animations.

Provides emergency nurses and other trauma care providers with a wealth of practical information for managing trauma patients during the critical first hour of care. The content has been thoroughly updated and includes current topics in trauma care, clinical concepts, specific clinical practice issues and skills, and insight into special populations and their unique care
needs.

As The Required Textbook For NAEMT's Worldwide Prehospital Trauma Life Support Course, Prehospital Trauma Life Support (PHTLS) Is The Comprehensive, Internationally Renowned Resource For Learning Basic And Advanced Prehospital Trauma Skills And Concepts. Fully Revised And Updated, The Seventh Edition Provides Trauma Treatment And Guidelines That Are Proven To Reduce Morbidity And Mortality. Tailored Expressly For The Military Environment, The Last 12 Chapters Of This Book Reflect The Special Considerations Of The Military. These Unique Chapters Are Written By The Tactical Combat Casualty Care Committee On Trauma, The Leading Body That Oversees Trauma Care.

Provides a unified evidence-based approach to problems encountered in trauma and critical care surgical situations, with expert practical and up-to-date guidance on ventilator management, damage control, noninvasive techniques, imaging, infection control, dealing with mass casualties, treating injuries induced by chemical and biological agents, and much more.

Weil jede Sekunde zählt - ein Leitfaden für die ersten 24 Stunden. Von strukturellen Voraussetzungen bis hin zu wichtigen operativen und konservativen Techniken - stellen Sie bei der Schwerverletztenversorgung mit blitzschnellen Entscheidungen die richtigen Weichen für den Patienten.
